The litetable Package — Colorful Timetable*

Mingyu Xia <myhsia@outlook.com>†

Released 2025-03-26   v3.3G

1 Introduction

The litetable package provides a colorful design of timetable, developed by expl3 based on tikz. It supports various compilation methods, such as pdfLaTeX, XƎLaTeX, ApLaTeX, LuaLaTeX, etc. Click to jump to the manual's [Chinese Version] [Cantonese Version].

2 Usage

To load this package, write the line

    \usepackage{litetable}

litetable (*env.*)   The `litetable` environment can create a blank timetable frame, and it should be executed after commands \timelist and \weeklist.

    \begin{litetable} [⟨*keys*⟩] {⟨*title*⟩} [⟨*keys*⟩] ... \end{litetable}

The mandatory argument can set the title of the timetable, and the optional argument accepts the following keys

color = ⟨string⟩ can set the background color (Default: gray), this key's name could be omitted.

sem = ⟨string⟩ can set the semester information at the northeast corner of the page.

\weeklist \weeklist [⟨*keys*⟩] {⟨*list*⟩} [⟨*keys*⟩]

The mandatory argument accepts an array to set a list of working days and the width of each column at the top of the timetable. The optional argument accepts the following keys

format = ⟨format commands⟩ can set the font for the list of working days (Default: \bfseries).

sep = ⟨dim⟩ can set the separator of the list of working days (Default is empty).

    \weeklist [format = \bfseries \scshape, sep = \textbar]
      { Mon -> 1, Tue -> 1, Wed -> 1, Thu -> 1, Fri -> 1 }

---

*https://github.com/myhsia/litetable, https://ctan.org/pkg/litetable
†Lijun Guo developed an interface to read ⟨*left*⟩ -> ⟨*right*⟩ data structures, and make compatibility for lower versions of TeX Live.

`\timelist` `\timelist [⟨keys⟩] {⟨list⟩} [⟨keys⟩]`

The mandatory argument accepts an array to set the time list on the left side of the timetable. The optional argument accepts the following keys

numformat = ⟨`format commands`⟩ can set the font for the sequence number of the time list (Default: `\ttfamily \bfseries`).

timefont = ⟨`format commands`⟩ can set the font for the time of the time list. (Default: `\ttfamily`).

hidetime = ⟨`true|false`⟩ hide the time in the time list and only retain the sequence number. The initial value is `false`.

```
\timelist [ numformat = \bfseries, timeformat = \ttfamily ]
   { 08:30 -> 10:00, 10:30 -> 12:00, 13:00 -> 14:30, 15:00 -> 16:30 }
```

`\course` `\course [⟨keys⟩] {⟨start⟩} [⟨keys⟩] {⟨end⟩} [⟨keys⟩]`

It's used to add course boxes on the current workday, and needs to be executed within the `litetable` environment. The two mandatory arguments can set the start and ends of the course respectively, the optional argument accepts the following keys

color = ⟨`string`⟩ can set the color of the course box (Default: `teal`), this key's name could be omitted.

subject = ⟨`string`⟩ can set the name of the course.

location = ⟨`string`⟩ can set the location of the course.

lecture = ⟨`string`⟩ can set the lecture of the course.

comment = ⟨`string`⟩ can add footnote to the course.

TEXhackers note:
- If ⟨`start`⟩ = ⟨`end`⟩ (the height of the course box is 1 unit), then **location** and **lecture** will be outputted in the same line and **comment** will be hidden.
- The template will correct automatically if ⟨`start`⟩ and ⟨`end`⟩ were misplaced.
- If neither **location** nor **lecture** is assigned value, then **subject** will be outputted in the vertical center of the course box.
- Course boxes that exceed the range of the timetable won't display and it will return a warning. The input example refers to Appendix A.

`\newday` `\newday [⟨integral value⟩]`

It can move the next course boxes right ⟨`integral value`⟩ working days. The default value of the optional argument is 1.

`\more` `\more {⟨comment⟩}`
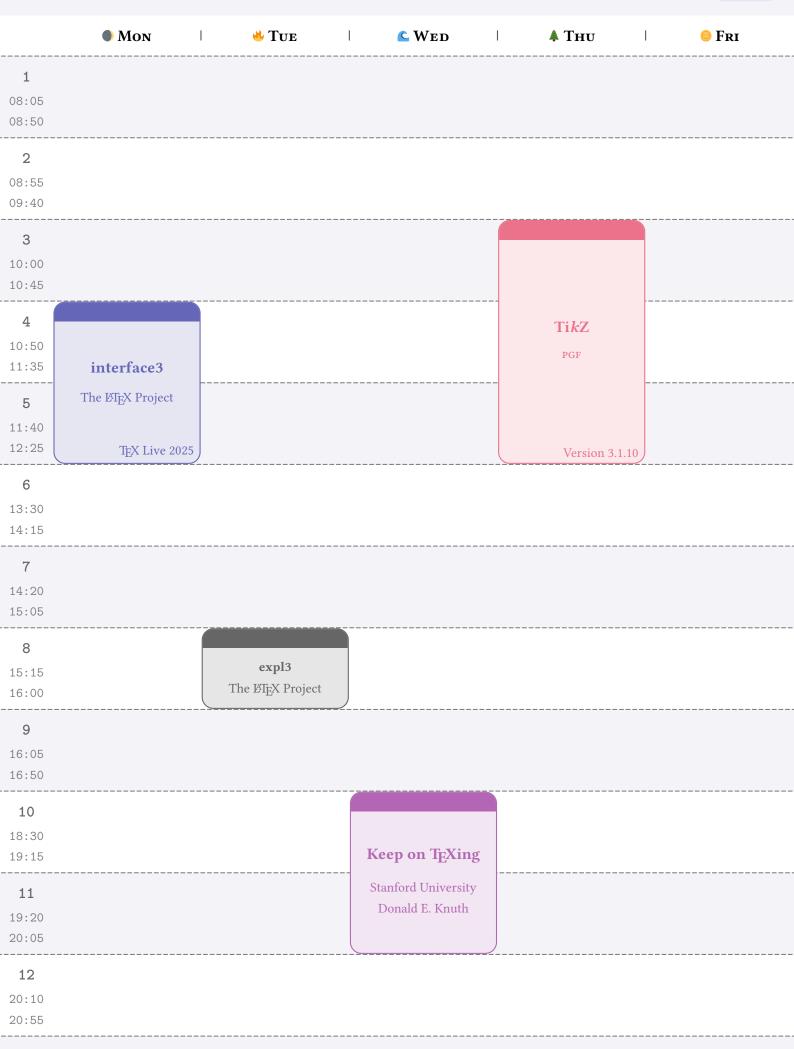

It can add a comment at the southwest corner of the timetable.

A   Working Example

```
\documentclass[svgnames]{article}

\usepackage{litetable, twemojis}
\usepackage[mono = false]{libertine}
\usepackage[T1]{fontenc}

\begin{document}

\weeklist [ format = \bfseries \scshape, sep = \textbar ]
  {
    \texttwemoji{1f312} Mon -> 1, \texttwemoji{1f525} Tue -> 1,
    \texttwemoji{1f30a} Wed -> 1, \texttwemoji{1f332} Thu -> 1,
    \texttwemoji{1fa99} Fri -> 1
  }
\timelist [ numformat = \ttfamily \bfseries, timeformat = \ttfamily ]
  {
    08:05 -> 08:50, 08:55 -> 09:40, 10:00 -> 10:45, 10:50 -> 11:35,
    11:40 -> 12:25, 13:30 -> 14:15, 14:20 -> 15:05, 15:15 -> 16:00,
    16:05 -> 16:50, 18:30 -> 19:15, 19:20 -> 20:05, 20:10 -> 20:55
  }
\begin{litetable} [ MidnightBlue, sem = SEM 7 ] { Course Schedule }
  \course [ subject = interface3, comment = \TeX{} Live 2025,
            lecture = The \LaTeX{} Project, DarkBlue ] {4} {5}
  \newday
  \course [ subject = expl3, lecture = The \LaTeX{} Project ] {8} {8}
  \newday
  \course [ subject = Keep on \TeX ing, lecture = Donald E. Knuth,
            location = Stanford University, Purple ] {10} {11}
  \newday
  \course [ subject = Ti\textit k\/Z, lecture = \textsc{pgf},
            Crimson, comment = Version 3.1.10 ] {3} {5}
  \more { Programme Duration: 09 / 2021 -- 07 / 2025 }
\end{litetable}

\end{document}
```
